ABSTRACT

Intended for researchers in nursing and health-related disciplines, this guide provides an annotated listing of 115 health science reference sources found in the libraries of the University of Tennessee, Knoxville. An introduction to library research covers use of the card catalog, the serials holdings list, and Library of Congress call numbers. Sources of periodical articles, book reviews, and abstracts are described, including general information indexes; biomedical, nursing, and health care indexes and abstracts; social sciences indexes and abstracts; and databases. A section on biomedical, psychiatric, and psychological dictionaries and manuals precedes sections on pharmacological reference sources and nursing and health science handbooks and directories. Also described are indexes to sources of statistics and publications containing general social statistics and statistics specifically related to the health care fields. An author/title index concludes the publication. (ESR)

PREFACE

This guide is intended for researchers in nursing and health related disciplines. It is a selective list of indexes, abstracts, dictionaries, and handbooks available in the UTK libraries. A special section is devoted to publications which provide general social statistics as well as statistics specifically related to health care fields.

Location of these materials in the library system is indicated by the Library of Congress classification number and the following designations:

MAIN	Main Library, Cumberland Avenue
MAIN REF	Reference/Documents, 2d floor, Main Library
UGL	Undergraduate Library, Volunteer Blvd.
UGL REF	Reference, 3d floor, Undergraduate Library
AG-VET MED	Agriculture-Veterinary Medicine Library, Veterinary Teaching Hospital Agriculture Campus
LAW	Law Library, 202-203 Law Building, Cumberland Avenue

Publications in this guide were selected and annotated by Linda Sammataro, Health Sciences Librarian, Reference/Documents Department, Main Library.

Revised August 1983.

I. INTRODUCTION TO LIBRARY RESEARCH

Library research begins with the card catalog. The card catalog in the Main Library is a "union" catalog listing all materials in the campus library system. The card catalog in each branch library lists only the materials at that library. For each item, an author, title, and one or more subject cards may be found. The cards are arranged in one alphabetical sequence. Words and phrases used as subject headings in the card catalog are listed in the two-volume Library of Congress Subject Headings, copies of which are available near the card catalog in all libraries.

Books in the UTK Library are classified and arranged according to the Library of Congress classification scheme, an arrangement using the letters of the alphabet followed by numbers. When you have located the materials you need in the card catalog, make a note of the complete call number and the location stamps, if any, which indicate the library which has that item.

PLEASE NOTE -

Because of several changes and consolidations in the library system over the years, cards stamped "Business Administration" or "Education" (as well as "UGL") refer to materials now housed in the Undergraduate Library. Cards stamped "Engineering," "Biology," "Chemistry," or "SCI-ENGR" refer to materials now integrated into the Main Library.

If the material you need for your research is not available in the UTK Library, it may be obtained through interlibrary loan from another library. The Interlibrary Services Department, located on the second floor of the Main Library, will accept requests for such materials.

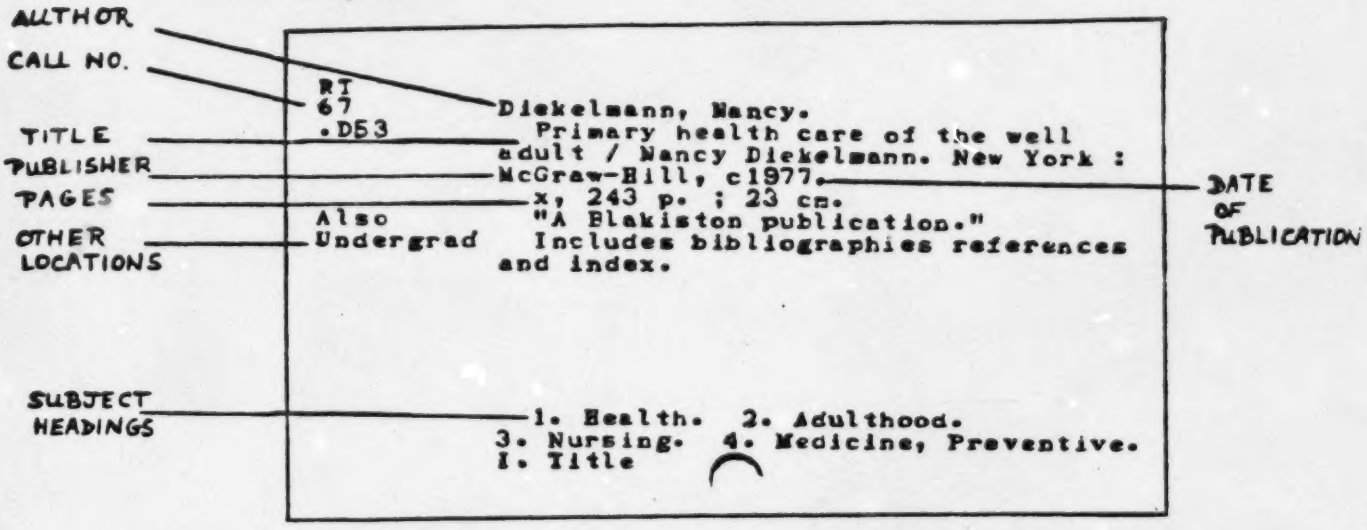
Remember to ask a reference librarian whenever you need assistance, either in utilizing the information sources listed in this research guide or for general directions on how to use the card catalog or find an item on the shelf.

IF YOU KNOW THE NAME OF AN AUTHOR, THE TITLE OF A BOOK OR PERIODICAL, OR NEED INFORMATION ON ANY SUBJECT, CHECK:

A. THE CARD CATALOG

Cards with authors' names, titles of books, periodicals or non-print materials, and subject headings are interfiled alphabetically in one alphabet. The Library of Congress Subject Headings, located on the tables throughout the card catalog area, can be used as a guide to subject headings in the UTK library catalog.

For example:



B. THE SERIALS HOLDINGS LIST

This listing is in both hard copy and microfiche format, with copies located throughout the library system. Periodicals are listed alphabetically by title, and under each title the call number, holdings and locations of bound and unbound issues are provided.

For example:

2. Biological Abstracts, A Comprehensive Abstracting and Indexing Journal of the World's Literature in Theoretical and Applied Biology, Exclusive of Clinical Medicine. v. 1- 1926- Philadelphia, Biological Abstracts, 1926- (Semimonthly with semiannual cumulations)

Each issue contains abstracts arranged by section and subsection, with separate author, biosystematic, generic, concept and subject indexes. Semiannual cumulations abstract about 90,000 articles from over 9,000 periodicals each year. About 20% of the journals are not covered by Index Medicus, and about 75% are published outside North America. The BIOSIS data base is the computerized version of Biological Abstracts and Biological Abstracts/RRM (next item).

International coverage of the field of nutrition. Abstracts are in English. Cites book reviews, symposia, and government reports as well as journal articles. Annual combined table of contents, author, and subject indexes to the classed arrangement of entries. CAB ABSTRACTS is the computerized data base.

Z 7401 .S365 MAIN REF 14. Science Citation Index. 1961- Philadelphia, Institute for Scientific Information, 1961- (Bimonthly, annual cumulation)

An international, multidisciplinary index to about 2,700 journals, symposia, proceedings and multi-authored books in over 100 scientific fields. There are three separate sections: 1) The Citation Index lists all authors with any article or book cited during the time period covered by that issue or volume. Information is given on both the article cited and the citing article, with separate sections for corporate authors and anonymous publications. 2) The Source Index gives full descriptions of citing items, listed by author, including titles and all references. 3) The Permuterm (keyword) Subject Index lists source journal articles by Primary Terms (words) appearing in the title, followed by Co-Terms (all other significant words) appearing in the same title. Five-year cumulations through 1974.
